

**METAOPTION**

**CASE STUDY**

**Acrobat Plug-in  
For  
Madison Title Agency, LLC**

## **CASE STUDY**

### **Acrobat Plug-in**

#### **The Client**

Madison Title Agency, LLC is a full service resource agency for all parties involved in the real estate closing process.

#### **Challenge & Solutions**

The company required a plug-in that could work with documents created in Acrobat professional 6.0/7.0/8.0.

The plug-in MetaOption created provides a user interface for entering information related to a document, such as title number, categories, subcategories, descriptions and notes. The user is then able to save this information into the database, as well as save the document into the specified network derive path.

#### **Features**

- Easy interface
- Opened doc may be saved to specific network location
- Records may be inserted into database with information entered in input screen including location and name of saved document

#### **Technology & Environment**

- Adobe Acrobat 6.0/7.0/8.0 SDK
- C++
- Development Environment: Visual Studio .Net 2003
- Windows Operating System: XP or later
