“I have been working with MetaOption for several months now on a project that I have had many problems with in the past with other programming companies. They have been easy to work with and have kept the program on schedule. The project is somewhat difficult (Objective C, Cocoa and Mac) but they have always had a good understanding of what needs to be done. I for see no problems with getting the program finished and out into the marketplace as planned. I look forward to working with them again on future projects.”
