Solutions for today and tomorrow's business needs

MetaOption can help analyze and access your company's requirements for a wide range of IT solutions. We bring a holistic perspective to ensure we understand your environment and unique needs, and apply our expertise to craft the best solution available for you.

Accounting & ERP

- **Microsoft Dynamics 365:** Dynamics 365 unifies CRM and ERP capabilities into applications that work seamlessly together across sales, customer service, field service, operations, financials, marketing, and project service automation.
- **Microsoft Dynamics 365 Business Central (Dynamics NAV):** Dynamics 365 Business Central Modernize your business operations across finance, manufacturing, and supply chain to drive new growth. Previously known as Dynamics NAV, is designed for businesses looking for an all-in-one business management solution that's easy to use and adapt. Connect your finances, sales, service, and operations to streamline business processes, improve customer interactions, and enable growth .
- **Microsoft Dynamics 365 for Finance & Operations:** Previously known as Dynamics AX, is a complete Enterprise Edition delivers enterprise ERP capabilities within a single, cloud-based business application. Supply chain, financials, sales and purchase orders, inventory, production, and distribution processes are seamlessly connected all in one app.
- **Microsoft Dynamics GP:** Dynamics GP enables users to make proactive and informed decisions that have a direct impact on their productivity and bottom line-increasing margins and improving their cash flow.

Microsoft Dynamics Add-Ons

- **Pharma Track & Trace Dynamics 365 Business Central (Dynamics NAV) Add-on:** Comply with drug serialization and reporting requirements and fight counterfeiting and illicit trade with Microsoft Dynamics 365 Business Central Track and Trace for Pharma. This Track and Trace software integrates serialization with your processes and provides country-ready reporting packages.
- **Jet Reports for Microsoft Dynamics 365 Business Central (Dynamics NAV):** Jet Reports is an integrated suite of reporting and business intelligence tools that range from individual ad-hoc reporting to enterprise level reporting and business intelligence. As an add-on to Excel, it lets you access your Dynamics 365 Business Central tables and data. You can build reports directly within Excel and drill down into Business Central for the underlying data.
- **MetaDocs – Document Management Add-on for Dynamics 365 Business Central (Dynamics NAV) Add-on:** A complete Document Management solution that allows you to scan documents straight into Business Central or drag and drop electronic documents from multiple locations into NAV. Users can set up rules for storing different types of documents in specific locations in Business Central, on a local file storage, cloud storage or on you SharePoint Intranet. Access your data outside your office using any Web Browser or go mobile with our Android and iOS apps.

EDI Integration

With the EDI for Microsoft Dynamics Solutions (NAV, 365 Business Central, AX, and GP), you can automate operations and eliminate the error-prone manual processes that slow you down and cost you money. With seamless integration MetaOption's EDI for Dynamics solution enables the exchange of messages to be fully automated, removing the need for error prone manual processes; whilst delivering complete end-to-end visibility.

Microsoft Cloud

- **Office 365:** Office 365 gives you the familiarity and power of Microsoft Office with the flexibility of the cloud. With Office in the cloud, user's applications, files and emails are with you wherever you go, whether they're working offline at their desktop, online, or on one of their devices. They can edit files on any PC or Mac; Email or share files from their tablet; Join an online meeting from their phone. Integrated Solutions Across IT Consulting, Microsoft Technologies, Infrastructure, Applications, and Business Processes.
- **Microsoft Azure:** Microsoft Azure enables organizations of all sizes to get to the cloud quicker with maximum affordability and flexibility. The Azure platform is used to deliver superior performance while helping to control costs. It can extend your infrastructure and provide scalable, durable cloud storage, backup and recovery solutions for any data, big and small.

Microsoft Dynamics Hosting

Microsoft Dynamics hosted ERP is a line of integrated, adaptable business software solutions that automate and help improve financial, customer relationship, and supply chain management. It fits with user's systems, and works with and like other Microsoft products familiar to you helping staff members across your organization be more productive, to make better decisions, and pursue business goals with confidence.

Microsoft Dynamics Support

MetaOption provides an array of support services for Microsoft Dynamics NAV, 365 Business Central, Dynamics 365, AX and GP. MetaOption's support facility consists of a dedicated team of full time support engineers who provide excellent customer support services. We have built our business upon maintaining excellent long-term relationships with our customers.

Managed Services

Enterprise solutions can drive real value only if they're effectively managed by the right team. As a globally recognized Microsoft Gold Partner, we are able to provide end-to-end support for Office 365, SharePoint and any application or platform built using the Microsoft technology stack. We can provide cost-effective, tailored support services to provide any company a peace of mind and governance.

Custom Application Development

Many times, ready-made, pre-packaged applications fail to meet the requirements of customers, because of their unique needs and differing business practices and processes. We have in-house, highly knowledgeable, IT consultants for project analysis, formulation and concept planning, right up to project management and implementation. We develop customized software that is completely based on our user's requirements with GUI (graphical user- friendly interface) on any platform/languages.

Customization and Integrations

MetaOption goes beyond software needs and adds business knowledge that helps propel companies to the next level. Our custom development and integration services provide your business with a true end-to-end, integrated solution that is built to meet your unique business needs.

IT Staffing Services

- **Temporary/Contract:** Get specialized consultants hired for a specific period- from a few months to as long as one year or more.
- **Permanent/Direct Hire:** We can provide consultants that can benefit your business's requirements and technical requirements on a permanent or direct hire basis.
- **Contract-to-Hire:** Our customers can request to hire temporary consultants to full-time positions, after an evaluation process is completed.

IT Infrastructure Services

We understand dynamic infrastructure requirements of global businesses today and provide effective, reliable end-to-end solutions through an "assess build manage transform" framework. Leveraging our partner eco-system and using an analytics-based approach, we help you seamlessly shift from a traditional infrastructure outsourcing model to new generation delivery model.
